SUBJECT INDEX

Absorption spectroscopy
Chromate reductase activity: Characterization of Cr(VI) to Cr(III) conversion 219
Acetate ions
Studies on silver–silver carboxylate indicator electrodes: Part 1 – The silver–silver acetate electrode 555
Acid medium
Oxidation of secondary alcohols by sodium N-bromobenzenesulphonamide: A kinetic study 65
Kinetics of oxidation of S–N donor ligands by hydrogen peroxide 463
Acid-alkaline transition
Nature of distal amino acid residue responsible for acid-alkaline transition in HRP: Circular dichroism studies 431
Addition agent
Effect of dodecyl trimethylammonium bromide on electrocrystallization of copper 741
Adsorption
Effect of dodecyl trimethylammonium bromide on electrocrystallization of copper 741
$AgI–Ag_2SeO_4$ glasses
Physico-chemical investigation of fast ion conducting $AgI–Ag_2SeO_4$ glasses 541
Aggregation patterns
Chiral recognition through clays 203
Aldimine derivatives of amino acids
Chiroptical studies on coordination compounds of aldimine derivatives of amino acids 436
Alkoxylation sites
Alkoxylation sites in naturally occurring coumarins using ^1H NMR 737
Alkynes
A facile metathetical polymerisation of alkynes with metal carbonyls as catalysts 460
Amino acids
Kinetics and mechanism of Ru(III)-catalysed oxidation of amino acids by N-chloro-N-sodiotoluene-*p*-sulphonamide in acid media 7
Ammonia adsorption
Surface acidity in promoted molybdena and tungsta hydrodesulphurisation catalysts 117
Amphiphilic molecules
Laser Raman spectroscopic studies on the interaction of drug Dapsone with model membranes 697
Amrinone
Theoretical conformational study of the molecular structures of some bipyridine cardiotonics 159
Amylopectin
Raman and infrared spectra of starch samples of sweet potato and cassava 705
Amylose
Raman and infrared spectra of starch samples of sweet potato and cassava 705
Anodic oxidation of gallium
Cyclic voltammetric studies on gallium film electrodes in alkaline media 177
Anodic wave
Electroanalytical study of the anodic wave of 5-nitroorotic acid 25
Anomalous angular variation
Long range exchange interaction in (2,2′-bipyridine-3,3′-dicarboxylic acid)-dichlorocopper (II) monohydrate via lattice water: Single crystal EPR studies 437
Aqueous detergent micelles
Stability and characterization of iron(III) and iron(II) hemepeptides encapsulated in aqueous detergent micelles 429
Aqueous micellar media
Reactions in micellar solutions. Kinetics and mechanism of reversible complexation of iron(III) with NCS^-. salicyclic acid, salicylatopentamine-cobalt(III) and oxalatopentammine cobalt(III) in aqueous micellar media 454
Aromatic porphyrin-like macrocycles
Texaphyrins and sapphyrins: Novel aromatic porphyrin-like macrocycles 418
Aroylhydrazone complexes
Magnetic and spectral studies of transition metal complexes of salicylaldehyde-2-aminoacetophenone-2-thenoylhydrazone 503
Array-processing supercomputer
Superlocalization of fracton wavefunctions excited on percolating networks 581
Asymmetric sulphur ligands
Changing structural and chemical features of systems arsenic to bismuth with asymmetric sulphur ligands 441
Azetidinones
Synthesis and biological activity of 4-(N-arylidene acetylhydrazido)-1,4-benzothiazin-2,3-diones, azetidinones and thiazolidinones 535

Bacteriology
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713

Batch equilibration
Synthesis and characterization of 2-hydroxy-4-methoxyacetophenone-urea-formaldehyde resins and their ion-exchange-properties 31
Benzimidazole coordination
Models for blue copper proteins – The influence of tetrahedral distortion on spectra and redox 432
Benzonitrile
Rotational relaxation times from Raman band profiles for benzonitrile in different solvents 669
Benzothiazinones
Synthesis and biological activity of 4-(N-arylidene acetylhydrazido)-1,4-benzothiazin-2,3-diones, azetidinones and thiazolidinones 535
Benzoylpropionic acid
Crystal and molecular structure of 3-benzoylpropionic acid 39
Benzylamine oxidase
Electron nuclear double resonance spectroscopy of copper proteins 423
Binary operator
Topological solution of algebraic eigenvalue problem 51
Binding properties
Reconstituted heme proteins: An investigation of the binding of inorganic and organic substrates to Mn(III) horseradish peroxidase 428
Binding states
Chiral recognition through clays 203
Binuclear dioxomolybdenum(VI) complexes
Binuclear dioxomolybdenum(VI) complexes containing bridging dioxime Schiff base ligands 443
Biological activity
Synthesis and biological activity of 4-(N-arylidene acetylhydrazido)-1,4-benzothiazin-2,3-diones, azetidinones and thiazolidinones 535
Bipyridine cardiotonics
Theoretical conformational study of the molecular structures of some bipyridine cardiotonics 159
Bis-amide tetradentate ligand
Iron complexes of the *bis*-amide tetradentate ligand. Preparation, properties and reactivity 442
Bis-(imidazole) coordination
Models of the cytochromes-b and related heme proteins 353
Bivalent ions
Studies on the complexation behaviour of dehydroacetic acid-4-methyl-2-quinolylhydrazone with bivalent metal ions 497
Blue copper proteins
Models for blue copper proteins – The influence of tetrahedral distortion on spectra and redox 432
Bovine α-lactalbumin
Raman spectroscopic study of the environment of tryptophan residues in bovine α-lactalbumin 693
Bridging dioxime
Binuclear dioxomolybdenum(VI) complexes containing bridging dioxime Schiff base ligands 443
Bridging ligand
Tellurium as a bridging ligand in cluster synthesis 395
Bridging organic molecules
Spectral and magnetic investigations on some binuclear oxovanadium compounds 99
Bromamine-B
Oxidation of secondary alcohols by sodium N-bromobenzenesulphonamide: A kinetic study 65
Bromamine-T
Kinetics and mechanism of oxidation of carbohydrazide by chloramine-T and bromamine-T in aqueous perchloric acid medium 471
Butyl monoglycol sulphate
Laser Raman and infrared studies on hydrotropes and related materials 681

CNDO/2 approach
Nucleophilic substitution reactions in solution – A molecular orbital approach 81
Cadmium(II)
Mixed ligand complexes of cadmium(II) involving nitrilotriacetic acid 19
Carbohydrazide
Kinetics and mechanism of oxidation of carbohydrazide by chloramine-T and bromamine-T in aqueous perchloric acid medium 471
Carbonyl
Carbonyl complexes as homogeneous and supported catalysts 239
Carboxylato (amine) cobalt(III) ions
Kinetics and mechanism of metal ion catalysed aquation of some carboxylato (amine) cobalt(III) ions 455
Cassava
Raman and infrared spectra of starch samples of sweet potato and cassava 705
Catalysis
Carbonyl complexes as homogeneous and supported catalysts 239
Characteristic polynomial
Topological solution of algebraic eigenvalue problem 51
Study of trends in charge-transfer absorption maxima of some π-type molecular complexes using graph-theoretical techniques 759
Charge density
Charge, spin and theoretical densities in transition metal complexes 403

Charge-transfer complex
Study of trends in charge-transfer absorption maxima of some π-type molecular complexes using graph-theoretical techniques 759
Chelating behaviour
Naturally occurring metal transport agents: Chelating behaviour of 2,3-dihydroxybenzoic acid towards copper(II) 450
Chelation ion-exchange
Synthesis and characterization of 2-hydroxy-4-methoxyacetophenone-urea-formaldehyde resins and their ion-exchange properties 31
Chemical processing
Chemical processing of electronic ceramics with ultrafine particles 452
Chemical solar energy conversion processes
Laser Raman spectroscopy of colloidal semiconductor photosensitizers 613
Chiral environment
Some new aspects of lanthanide optical spectroscopy: Circular dichroism and two-photon absorption 255
Chiral recognition
Chiral recognition through clays 203
Chirality
Chiral recognition through clays 203
Chiroptical studies
Chiroptical studies on coordination compounds of aldimine derivatives of amino acids 436
Chloramine-T
Kinetics and mechanism of oxidation of carbohydrazide by chloramine-T and bromamine-T in aqueous perchloric acid medium 471
Kinetics and mechanism of Ru(III)-catalysed oxidation of amino acids by N-chloro-N-sodiotoluene-*p*-sulphonamide in acid media 7
N-Chloro-, 2-chloro- and 3-chlorohexanes
Vibrational spectra of 1,6-dichlorohexane, *n*-chloro-, 2-chloro and 3-chlorohexanes 661
p-Chloro cinnamic acid crystal
Laser Raman spectroscopic study of photoreaction dynamics in *p*-chloro cinnamic acid crystal 165
Chromate reductase activity
Chromate reductase activity: Characterization of Cr(VI) to Cr(III) conversion 219
Chromium (V) species
Chromate reductase activity: Characterization of Cr(VI) to Cr(III) conversion 219
Chromium (VI) reduction
Chromate reductase activity: Characterization of Cr(VI) to Cr(III) conversion 219
Circular dichroism
Some new aspects of lanthanide optical spectroscopy: Circular dichroism and two-photon absorption 255
Circular dichroism studies
Nature of distal amino acid residue responsible for acid-alkaline transition in HRP: Circular dichroism studies 431
Clays
Chiral recognition through clays 203
Cluster
Carbonyl complexes as homogeneous and supported catalysts 239
Cluster synthesis
Tellurium as a bridging ligand in cluster synthesis 395
Cobalt(III) complexes
Inter- and intramolecular electron transfer reactions of cobalt(III) complexes 433
Coherent Raman spectroscopy
Raman induced phase conjugation spectroscopy 565
Colloidal semiconductor photosensitizers
Laser Raman spectroscopy of colloidal semiconductor photosensitizers 613
Combined type II & type III sites
Model compounds for the type III site and the combined type II and type III sites in multicopper oxidases 209
Complexes of Bi and As
Changing structural and chemical features of systems arsenic to bismuth with asymmetric sulphur ligands 441
Conformational features
Theoretical conformational study of the molecular structures of some bipyridine cardiotonics 159
Coordination compounds
Studies on photochemically produced metal complexes with coordinated free radicals 319
Coordination compounds of carboxylates
Lanthanide carboxylates of potentially tridentate carboxylic acids and their coordination compounds 448
Coordination geometry
Analysis of the coordination geometry in copper complexes 481
Copper coordination
Analysis of the coordination geometry in copper complexes 481
Copper proteins
Electron nuclear double resonance spectroscopy of copper proteins 423
Copper(II) complexes
Naturally occurring metal transport agents: Chelating behaviour of 2,3-dihydroxybenzoic acid towards copper(II) 450
Copper(II)-amino acid complexes
Redox properties of copper(II) alicyclic α-amino acid complexes 458
Coumarins
Alkoxylation sites in naturally occurring coumarins using ^{1}H NMR 737

Crystal structure
Crystal and molecular structure of 3-benzoylpropionic acid 39
Cyclic voltammetry on gallium
Cyclic voltammetric studies on gallium film electrodes in alkaline media 177
Cytochromes P-450
Synthesis of selected metalloporphyrins and their applications as models for cytochromes P-450 and related mono oxygenases 419
Cytochromes-b
Models of the cytochromes-b and related heme proteins 353

Dapsone
Laser Raman spectroscopic studies on the interaction of drug Dapsone with model membranes 697
Data analysis
Analysis of the coordination geometry in copper complexes 481
Debye temperature
Einstein-like phonons in InSe 601
Dehydroacetic acid-4-methyl-2-quinolylhydrazone
Studies on the complexation behaviour of dehydroacetic acid-4-methyl-2-quinolylhdrazone with bivalent metal ions 497
Density of state
Density of states of fractons on percolating networks 575
Depolarization ratios
Depolarization ratio of low-frequency hydrogen bond Raman bands for semicrystalline pyrazinamide 653
Di-*i*-propyltin dichloride
Preparation and spectral studies of di-*i*-propyltin dichloride and its adducts with some N-donors 440
Diabasic quadridentate Schiff bases
Reactions of organoantimony (V) compounds with ONNO and SNNS donors 451
Diaminocarboxylic acid
Stability and structure of Cu(II) and Zn(II) ternary complexes with L-glutamic acid and some diaminocarboxylic acids 731
2,2′-Dibromophenol
Laser Raman spectra of 2,4- and 2,2′-dibromophenols 677
2,4-Dibromophenol
Laser Raman spectra of 2,4- and 2,2′-dibromophenols 677
1,6-Dichlorohexane
Vibrational spectra of 1,6-dichlorohexane, *n*-chloro-, 2-chloro and 3-chlorohexanes 661
Diethylenetriamine *bis*(dithiocarbamate)
Diethylenetriamine *bis*(dithiocarbamato) derivatives of some first row transition metals 725
2,3-dihydroxybenzoic acid
Naturally occurring metal transport agents: Chelating behaviour of 2,3-dihydroxybenzoic acid towards copper(II) 450
Diiron active centre
Synthetic model diruthenium analogue of the diiron active centres in hemerythrin biomolecules 425
Dimanganese complexes
Dimanganese complexes of a septadentate ligand. Functional analogues of the manganese pseudocatalase 424
Dinuclear phosphine bridged complex
Synthesis and reactivity of methylplatinum(II) complexes with unsymmetrical, potentially bidentate ligand (Ph_2 Ppy) 447
Diphosphazane ligands
Organometallic chemistry of diphosphazane ligands 283
Dipolar Hamiltonian
Planar 'coupled water pair' cluster in disordered solids: Theory of the 1H NMR dipolar Hamiltonian 769
Diruthenium analogue
Synthetic model diruthenium analogue of the diiron active centres in hemerythrin biomolecules 425
Distal amino acid residue
Nature of distal amino acid residue responsible for acid-alkaline transition in HRP: Circular dichroism studies 431
Distribution ratio
Synthesis and characterization of 2-hydroxy-4-methoxyacetophenone-urea-formaldehyde resins and their ion-exchange properties 31
Divalent silicon
Isolobal analogy between trivalent boron and divalent silicon 107
π-Donors
Synthesis and characterisation of substituted-tetrathia-fulvalene π-donors: *bis*(butylenedithio) tetrathiafulvalene (BBDT-TTF) and *bis*(*o*-xylenedithio) tetrathiafulvalene (BXDT-TTF) 449
Doped semiconductors
Effect of doping on stimulated Brillouin scattering in semiconductors 585
Duchenne muscular dystrophy
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713

EPR
Unsymmetrically ligated dioxobridged Mn(III,IV) complexes – synthesis and spectral studies 87
EPR of Au(II) complexes
Gold(II) complexes with hard–soft donor ligands 462

EPR spectroscopy
Chromate reductase activity: Characterization of Cr(VI) to Cr(III) conversion 219
ESR spectra
Diethylenetriamine *bis*(dithiocarbamato) derivatives of some first row transition metals 725
Eigenfunctions
Topological solution of algebraic eigenvalue problem 51
Eigenvalues
Topological solution of algebraic eigenvalue problem 51
Eigenvector
Study of trends in charge-transfer absorption maxima of some π-type molecular complexes using graph-theoretical techniques 759
Einstein temperature
Einstein-like phonons in InSe 601
Einstein-like phonons
Einstein-like phonons in InSe 601
Electrochemistry
Structure-function relationship in some macrocyclic dicopper complexes 269
π-Electron repulsions
Conformations of α, β-unsaturated ketones: An IR spectroscopic study 45
Electron density
Nonexistence of local maxima in molecular electrostatic potential maps 189
Electron energy loss spectra
Electron energy loss spectroscopic study of $Cr(CO)_6$, $Mo(CO)_6$ and $W(CO)_6$ in the vapour phase 1
Electron nuclear double resonance
Electron nuclear double resonance spectroscopy of copper proteins 423
Electron transfer reactions
Inter- and intramolecular electron transfer reactions of cobalt(III) complexes 433
Electron-hole potential
MNDO-EHP method for the calculation of vertical excitation energies 751
Electronic ceramics
Chemical processing of electronic ceramics with ultrafine particles 452
Electrostatic potential
Nonexistence of local maxima in molecular electrostatic potential maps 189
Entropic spin
Investigation of spin-glass behaviour in some mixed metal oxidic systems 453
Environment of Trp residues
Raman spectroscopic study of the environment of tryptophan residues in bovine α-lactalbumin 693
Enzymatic epoxidation
Novel substituted porphyrin with unusual properties: Octabromotetraphenyl porphyrin 420
Epilepsy
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713
Epoxidation of olefins
Homogeneous catalysis of epoxidation of olefins by mono- and binuclear Schiff base complexes 247
Evolution
Isotope heat effect in reactions involving hydrogen evolution on palladium catalyst particles 173
Excited state
MNDO-EHP method for the calculation of vertical excitation energies 751
Exponential trap distribution
Photoconductive properties of zeaxanthin in a sandwich cell 73

Fast ion conducting glasses
Physico-chemical investigation of fast ion conducting $AgI–Ag_2SeO_4$ glasses 541
Ferriverdin
Ferroverdin: Cation variation and recognition of isomeric *tris* chelate geometries by iron oxidation states 195
Ferroverdin
Ferroverdin: Cation variation and recognition of isomeric *tris* chelate geometries by iron oxidation states 195
Field dependence
Photoconductive properties of zeaxanthin in a sandwich cell 73
Fluorescence quenching
Singlet quenching of tetraphenylporphyrin and its metal derivatives by iron(III) coordination compounds 131
Fracton excitations
Superlocalization of fracton wavefunctions excited on percolating networks 581
Fracton wavefunctions
Superlocalization of fracton wavefunctions excited on percolating networks 581
Fractons
Density of states of fractons on percolating networks 575
Free and restricted rotation
Laser Raman spectra and free and restricted rotation in phenyl silicates 635
Functional analogues
Dimanganese complexes of a septadentate ligand. Functional analogues of the manganese pseudocatalase 424
Fundamental issues in octahedral substitutions
Some fundamental issues in octahedral substitutions 459

Glutamic acid
Stability and structure of Cu(II) and Zn(II) ternary complexes with L-glutamic acid and some diaminocarboxylic acids 731
Gold(II) complexes
Gold(II) complexes with hard-soft donor ligands 462
Group 6
Organometallic chemistry of diphosphazane ligands 283
Group frequency approach
Vibrational Raman spectra of some substituted uracils 687

HMO parameter
Study of trends in charge-transfer absorption maxima of some π-type molecular complexes using graph-theoretical techniques 759
Halogenated porphyrin
Novel substituted porphyrin with unusual properties: Octabromotetraphenyl porphyrin 420
Hammett and mY correlation
Nucleophilic substitution reactions in solution – A molecular orbital approach 81
Heat
Isotope heat effect in reactions involving hydrogen evolution on palladium catalyst particles 173
Heme proteins
Models of the cytochromes-b and related heme proteins 353
Hemerythrin biomolecules
Synthetic model diruthenium analogue of the diiron active centres in hemerythrin biomolecules 425
Hemoglobin
Metal ion environment in reconstituted hemoglobins and myoglobins 337
Heterogeneous catalysts
Laser Raman spectroscopy of colloidal semiconductor photosensitizers 613
High T_c superconductors
Chemical processing of electronic ceramics with ultrafine particles 452
High spin iron complexes
Structure of hemin aggregates in solution 430
Homogeneous catalysis
Homogeneous catalysis of epoxidation of olefins by mono- and binuclear Schiff base complexes 247
Horseradish peroxidase
Interaction of inorganic and organic substrates with lactoperoxidase and horseradish peroxidase: ^{15}N, ^{13}C and ^{1}H NMR and optical difference spectroscopic investigations 426
Hydrodesulphurisation catalyst
Surface acidity in promoted molybdena and tungsta hydrodesulphurisation catalysts 117
Hydrogen
Isotope heat effect in reactions involving hydrogen evolution on palladium catalyst particles 173
Hydrogen peroxide
Kinetics of oxidation of S–N donor ligands by hydrogen peroxide 463
Hydrotropes
Laser Raman and infrared studies on hydrotropes and related materials 681
Hydroxylation reaction
Novel substituted porphyrin with unusual properties: Octabromotetraphenyl porphyrin 420
Hypervalent phosphorus
Synthesis and reactivity of some novel metalated spirobicyclic phosphoranes 445

IR and NMR spectra
The synthesis, IR and NMR spectral studies of some methyltin-(IV) sulphonates and carboxylates 444
Imidazole planes
Models of the cytochromes-b and related heme proteins 353
InSe specific heat
Einstein-like phonons in InSe 601
Inelastic light-scattering
Superlocalization of fracton wavefunctions excited on percolating networks 581
Infrared and Raman spectra
Vibrational spectra of 1,6-dichlorohexane, *n*-chloro-, 2-chloro and 3-chlorohexanes 661
Infrared spectra
Diethylenetriamine *bis*(dithiocarbamato) derivatives of some first row transition metals 725
Inorganic and organic substrates
Interaction of inorganic and organic substrates with lactoperoxidase and horseradish peroxidase: ^{15}N, ^{13}C and ^{1}H NMR and optical difference spectroscopic investigations 426
Intensity anomalies
Raman scattering in magnetic materials 629
Inter/intramolecular hydrogen bond
Depolarization ratio of low-frequency hydrogen bond Raman bands for semicrystalline pyrazinamide 653
Interaction of nucleic acid bases with Au(II) complexes
Gold(II) complexes with hard-soft donor ligands 462
Interference effect
Raman scattering in magnetic materials 629

Inverted band structure
Resonance Raman scattering in mercury telluride 643
Iron carbonyl and Pd, Pt and Rh complexes
Organometallic chemistry of diphosphazane ligands 283
Iron complexes
Iron complexes of the *bis*-amide tetradentate ligand. Preparation, properties and reactivity 442
Iron heme peptides
Stability and characterization of iron(III) and iron(II) heme peptides encapsulated in aqueous detergent micelles 429
Iron(II) complexes
Iron(II) complexes of *o*-functionalized *p*-naphthoquinones. 2. Crystal and molecular structure of *bis*(aquo) *bis*(lawsone) iron(II) and intermolecular magnetic exchange interactions in *bis*(aquo) *bis*(3-aminolawsone) iron(II) 446
Iron(II) thiazoline complexes
Nature of spin state transition in Fe(II) thiazoline complexes: Specific heat measurements 457
Iron(III) coordination compounds
Singlet quenching of tetraphenylporphyrin and its metal derivatives by iron(III) coordination compounds 131
Isolobal analogy
Isolobal analogy between trivalent boron and divalent silicon 107
Isotope
Isotope heat effect in reactions involving hydrogen evolution on palladium catalyst particles 173
Isotropic and anisotropic components
Rotational relaxation times from Raman band profiles for benzonitrile in different solvents 669

Jahn–Teller distortion
Structure and bonding in metallocenes and oligomers 379

Kinetics
Oxidation of secondary alcohols by sodium N-bromobenzene-sulphonamide: A kinetic study 65
Kinetics and mechanism
Kinetics and mechanism of Ru(III)-catalysed oxidation of amino acid by N-chloro-N-sodiotoluene-*p*-sulphonamide in acid media 7
Kinetics of oxidation
Kinetics of oxidation of S–N donor ligands by hydrogen peroxide 463

LO phonon spectra
Raman scattering of ZnSe grown by molecular beam epitaxy 593
Lactoperoxidase
Interaction of inorganic and organic substrates with lactoperoxidase and horseradish peroxidase: ^{15}N, ^{13}C and ^{1}H NMR and optical difference spectroscopic investigations 426
Lactoperoxidase-catalyzed oxidation
Lactoperoxidase-catalyzed oxidation of thiocyanate by hydrogen peroxide: ^{15}N NMR and optical spectral studies 427
Lanthanide carboxylates
Lanthanide carboxylates of potentially tridentate carboxylic acids and their coordination compounds 448
Lanthanide optical spectroscopy
Some new aspects of lanthanide optical spectroscopy: Circular dichroism and two-photon absorption 255
Laser Raman spectra
Laser Raman spectra of 2,4- and 2,2′-dibromiophenols 677
Laser Raman spectra
Laser Raman spectroscopic studies on the interaction of drug Dapsone with model membranes 697
Laser Raman spectra
Laser Raman spectra and free and restricted rotation in phenyl silicates 635
Laser Raman spectroscopy
Laser Raman spectroscopy of colloidal semiconductor photosensitizers 613
Laser Raman spectroscopy
Laser Raman and infrared studies on hydrotropes and related materials 681
Lattice vibrations
Depolarization ratio of low-frequency hydrogen bond Raman bands for semicrystalline pyrazinamide 653
Lattice water
Long range exchange interaction in (2,2′-bipyridine-3,3′-dicarboxylic acid)-dichlorocopper(II) monohydrate via lattice water: Single crystal EPR studies 437
Leprosy
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713
Ligand redistribution reactions
The synthesis, IR and NMR spectral studies of some methyltin-(IV) sulphonates and carboxylates 444

Local maxima
Nonexistence of local maxima in molecular electrostatic potential maps 189
Long range exchange interaction
Long range exchange interaction in (2,2′-bipyridine-3,3′-dicarboxylic acid)-dichlorocopper(II) mono-

hydrate via lattice water: Single crystal EPR studies 437
Longford-Gray formalism
Some fundamental issues in octahedral substitutions 459
Low-frequency Raman spectra
Depolarization ratio of low-frequency hydrogen bond Raman bands for semicrystalline pyrazinamide 653

MNDO
MNDO-EHP method for the calculation of vertical excitation energies 751
MNDO calculations
Isolobal analogy between trivalent boron and divalent silicon 107
Macrocyclic dicopper complexes
Structure-function relationship in some macrocyclic dicopper complexes 269
Macrocyclic ligands
Metal-ion assisted syntheses of macrocyclic ligands and their use in modelling the active sites of metalloproteins 421
Magnetic exchange interactions
Iron(II) complexes of *o*-functionalized *p*-naphthoquinones. 2. Crystal and molecular structure of *bis*(aquo) *bis*(lawsone) iron(II) and intermolecular magnetic exchange interactions in *bis*(aquo) *bis*(3-aminolawsone) iron(II) 446
Magnetic materials
Raman scattering in magnetic materials 629
Magnetic moment
Diethylenetriamine *bis*(dithiocarbamato) derivatives of some first row transition metals 725
Magnetic properties
Structure-function relationship in some macrocyclic dicopper complexes 269
Manganese pseudocatalase
Dimanganese complexes of a septadentate ligand. Functional analogues of the manganese pseudocatalase 424
Manganese(III) complexes
Kinetics of the interaction of *trans*-cyclohexane-1, 2-diamine-NNN′N′-tetraacetatomanganate(III) with thiourea and N-substituted derivatives. A stopped-flow spectrophotometric study 456
Mechanism of oxide film growth
Cyclic voltammetric studies on gallium film electrodes in alkaline media 177
Melt quenching
Physico-chemical investigation of fast ion conducting $AgI-Ag_2SeO_4$ glasses 541
Mercury telluride
Resonance Raman scattering in mercury telluride 643
Metal carbonyl catalysts
A facile metathetical polymerisation of alkynes with metal carbonyls as catalysts 460
Metal ion environment
Metal ion environment in reconstituted hemoglobins and myoglobins 337
Metal transport agents
Naturally occurring metal transport agents: Chelating behaviour of 2,3-dihydroxybenzoic acid towards copper(II) 450
Metal-alkyl complexes
Studies on photochemically produced metal complexes with coordinated free radicals 319
Metal ion assisted synthesis
Metal-ion assisted syntheses of macrocyclic ligands and their use in modelling the active sites of metalloproteins 421
Metal-ion catalysed aquation
Kinetics and mechanism of metal ion catalysed aquation of some carboxylato (amine) cobalt(III) ions 455
Metalated spirobicyclic phosphoranes
Synthesis and reactivity of some novel metalated spirobicyclic phosphoranes 445
Metallocenes
Structure and bonding in metallocenes and oligomers 379
Metalloporphyrins
Synthesis of selected metalloporphyrins and their applications as models for cytochromes P-450 and related mono oxygenases 419
Resonance Raman studies of metalloporphyrins 291
Metalloproteins
Metal-ion assisted syntheses of macrocyclic ligands and their use in modelling the active sites of metalloproteins 421
Electron nuclear double resonance spectroscopy of copper proteins 423
Metaloxo species
Homogeneous catalysis of epoxidation of olefins by mono- and binuclear Schiff base complexes 247
Metathetical polymerisation
A facile metathetical polymerisation of alkynes with metal carbonyls as catalysts 460
Metathetical reactions
The synthesis, IR and NMR spectral studies of some methyltin-(IV) sulphonates and carboxylates 444
Methyl platinum(II) complexes
Synthesis and reactivity of methylplatinum(II) complexes with unsymmetrical, potentially bidentate ligand (Ph_2Ppy) 447
Methyltin(IV) sulphonates and carboxylates
The synthesis, IR and NMR spectral studies of some methyltin(IV) sulphonates and carboxylates 444
Milrinone
Theoretical conformational study of the molecular structures of some bipyridine cardiotonics 159

Mixed carboxylic-dithiocarbamic anhydride
Synthesis of amides and peptides using polymer-bound mixed carboxylic dithiocarbamic anhydrides 521
Mixed inorganic oxides
Chemical processing of electronic ceramics with ultrafine particles 452
Mixed ligand complex
Mixed ligand complexes of cadmium(II) involving nitrilotriacetic acid 19
Mixed metal oxidic systems
Investigation of spin-glass behaviour in some mixed metal oxidic systems 453
Mixed valency
Unsymmetrically ligated dioxobridged Mn(III, IV) complexes – synthesis and spectral studies 87
Mn(III) horseradish peroxidase
Reconstituted heme proteins: An investigation of the binding of inorganic and organic substrates to Mn(III) horseradish peroxidase 428
Mn(III, IV) complexes
Unsymmetrically ligated dioxobridged Mn(III, IV) complexes – synthesis and spectral studies 87
Mode softening
Laser Raman spectroscopic study of photoreaction dynamics in *p*-chloro cinnamic acid crystal 165
Model membranes
Laser Raman spectroscopic studies on the interaction of drug Dapsone with model membranes 697
Modelling of active sites
Metal-ion assisted syntheses of macrocyclic ligands and their use in modelling the active sites of metalloproteins 421
Molecular beam epitaxy
Raman scattering of ZnSe grown by molecular beam epitaxy 593
Molecular electrostatic potential maps
Nonexistence of local maxima in molecular electrostatic potential maps 189
Molecular energy level schemes
Electron energy loss spectroscopic study of $Cr(CO)_6$, $Mo(CO)_6$ and $W(CO)_6$ in the vapour phase 1
Molecular orbitals
Structure and bonding in metallocenes and oligomers 379
Molecular oxygen evolution
Photochemistry of aqueous and non-aqueous solutions of nitrate ion 435
Molecular structure
Crystal and molecular structure of 3-benzoyl-propionic acid 39
Molecular superconductivity
Synthesis and characterisation of substituted-tetrathia-fulvalene π-donors: *bis*(butylenedithio) tetrathiafulvalene (BBDT-TTF) and *bis*(*o*-xylenedithio) tetrathiafulvalene (BXDT-TTF) 449
Molybdena
Surface acidity in promoted molybdena and tungsta hydrodesulphurisation catalystts 117
Mono- and dications and dimers
Spectroscopic studies on monomers and dimers of thiaporphyrins 307
Mono-oxygenases
Synthesis of selected metalloporphyrins and their applications as models for cytochromes P-450 and related mono oxygenases 419
Mononuclear iridium(I) complex
Unusual shielding of *i*-propyl protons of 2-substituted benzimidazole in a mononuclear iridium(I) complex 439
Morphology
Effect of dodecyl trimethylammonium bromide on electrocrystallization of copper 741
Mössbauer technique
Investigation of spin-glass behaviour in some mixed metal oxidic systems 453
Multicopper oxidases
Model compounds for the type III site and the combined type II and type III sites in multicopper oxidases 209
Multinuclear NMR
Interaction of inorganic and organic substrates with lactoperoxidase and horseradish peroxidase: ^{15}N, ^{13}C and ^{1}H NMR and optical difference spectroscopic investigations 426
Myoglobin
Metal ion environment in reconstituted hemoglobins and myoglobins 337

N-type crystals
Effect of doping on stimulated Brillouin scattering in semiconductors 585
2-D NMR
Unusual shieliding of *i*-propyl protons of 2-substituted benzimidazole in a mononuclear iridium(I) complex 439
^{15}N NMR
Lactoperoxidase-catalyed oxidation of thiocyanate by hydorgen peroxide: ^{15}N NMR and optical spectral studies 427
NMR and spectral studies
NMR and other physicochemical studies of uranium complexes with semicarbazone and hydrazone 438
NMR studies
Stability and characterization of iron(III) and iron(II) heme peptides encapsulated in aqueous detergent micelles 429
Narrow gap semiconductors
Raman scattering in narrow-gap semiconductors 607

Nature of ligand
Study of the effect of nature of ligand on reproportionation constants of ternary complexes 513
Neurology
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713
Neutral tetradentate ligand
Iron complexes of the *bis*-amide tetradentate ligand. Preparation, properties and reactivity 442
Nickel complexes
Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions 329
Nitrilotriacetic acid
Mixed ligand complexes of cadmium(II) involving nitrilotriacetic acid 19
5-Nitroorotic acid
Electroanalytical study of the anodic wave of 5-nitroorotic acid 25
Non-rigid molecules
Laser Raman spectra and free and restricted rotation in phenyl silicates 635
Nonlinear interaction
Effect of doping on stimulated Brillouin scattering in semiconductors 585
Nucleophilic attack
The mechanism of action of xanthine oxidase 422

Octabromotetraphenyl porphyrin complexes
Novel substituted porphyrin with unusual properties: Octabromotetraphenyl porphyrin 420
One-dimensional sandwich compounds
Structure and bonding in metallocenes and oligomers 379
One-electron oxidation
One-electron oxidation of toluidine blue. A pulse radiolysis study 147
Optical difference spectroscopy
Interaction of inorganic and organic substrates with lactoperoxidase and horseradish peroxidase: ^{15}N, ^{13}C and ^{1}H NMR and optical difference spectroscopic investigations 426
Optical spectral studies
Lactoperoxidase-catalyzed oxidation of thiocyanate by hydrogen peroxide: ^{15}N NMR and optical spectral studies 427
Optical susceptibility
Effect of doping on stimulated Brillouin scattering in semiconductors 585
Orbital degeneracy
Charge, spin and theoretical densities in transition metal complexes 403
Organic photoconductors
Photoconductive properties of zeaxanthin in a sandwich cell 73
Organoantimony(V) compounds
Reactions of organoantimony(V) compounds with ONNO and SNNS donors 451
Orthorhombic lattice
Magnetic and spectral studies of transition metal complexes of salicylaldehyde-2-aminoacetophenone-2-thenoylhydrazone 503
Overpotentials
Effect of dodecyl trimethylammonium bromide on electrocrystallization of copper 741
Oxidation kinetics
Kinetics and mechanism of oxidation of carbohydrazide by chloroamine-T and bromamine-T in aqueous perchloric acid medium 471
Oxidation mechanism
Kinetics and mechanism of oxidation of carbohydrazide by chloramine-T and bromamine-T in aqueous perchloric acid medium 471
Oxovanadium compounds
Spectral and magnetic investigations on some binuclear oxovanadium compounds 99
Oxygen atom transfer reactions
Thermodynamic fitness of an $Ru^{III}(EDTA)/Ru^{V}$=O(EDTA) couple in the oxygen atom transfer reactions 231
Oxygen evolution
Unsymmetrically ligated dioxobridged Mn(III,IV) complexes – synthesis and spectral studies 87
Oxygen transfer
Oxygen transfer from peroxometalates as a new route to the synthesis of uncommon and unknown oxopolymetalates: Synthesis and crystal and molecular structure of $(PPN)_2[W_6O_{19}]$–$(PPN)_2[Mo_2O_7]$ 461

Palladium complexes
Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions 329
Peroxo-metal and non-metal compounds
Newer manifestations of reactivity of coordinated peroxide at metal and non-metal centres 365
Peroxometalates
Oxygen transfer from peroxometalates as a new route to the synthesis of uncommon and unknown oxopolymetalates: Synthesis and crystal and molecular structure of $(PPN)_2[W_6O_{19}]$ and $(PPN)_2[Mo_2O_7]$ 461
Phase conjugate property
Raman induced phase conjugation spectroscopy 565
Phenyl silicates
Laser Raman spectra and free and restricted rotation in phenyl silicates 635

Phonon-mediated reaction
Laser Raman spectroscopic study of photoreaction dynamics in *p*-chloro cinnamic acid crystal 165
Photo-reduction and photo-oxidation
Resonance Raman studies of metalloporphyrins 291
Photochemistry
Photochemistry of aqueous and non-aqueous solutions of nitrate ion 435
Studies on photochemically produced metal complexes with coordinated free radicals 319
Photoconductivity decay
Photoconductive properties of zeaxanthin in a sandwich cell 73
Photooxidation
Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions 329
Photosensitized energy transfer reactions
Photosensitized energy transfer reactions of *tris*(4,4′-dialkyl-2,2′-bipyridine) ruthenium(II) complexes with substituted styrylpyridines 434
Planar water pair
Planar 'coupled water pair' cluster in disordered solids: Theory of the ^{1}H NMR dipolar Hamiltonian 769
Plasmon-LO phonon coupling modes
Raman scattering in narrow-gap semiconductors 607
Platinum complexes
Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions 329
Polarity of the conformers
Conformations of α, β-unsaturated ketones: An IR spectroscopic study 45
Polarography
Electroanalytical study of the anodic wave of 5-nitroorotic acid 25
Polymer-analogous reaction
Synthesis of amides and peptides using polymer-bound mixed carboxylic dithiocarbamic anhydrides 521
Polymer-bound anhydrides
Synthesis of amides and peptides using polymer-bound mixed carboxylic dithiocarbamic anhydrides 521
Polymeric acyl transfer reagents
Synthesis of amides and peptides using polymer-bound mixed carboxylic dithiocarbamic anhydrides 521
Porphyrin macrocycles
Spectroscopic studies on monomers and dimers of thiaporphyrins 307
Porphyrins
Singlet quenching of tetraphenylporphyrin and its metal derivatives by iron(III) coordination compounds 131
Potentially bidentate ligands
Synthesis and reactivity of methylplatinum(II) complexes with unsymmetrical, potentially bidentate ligand (Ph_2Ppy) 447
Potentially tridentate carboxylic acids
Lanthanide carboxylates of potentially tridentate carboxylic acids and their coordination compounds 448
Potentiometric studies
Mixed ligand complexes of cadmium(II) involving nitrilotriacetic acid 19
Proton NMR
Alkoxylation sites in naturally occurring coumarins using ^{1}H NMR 737
Proton NMR powder lineshapes
Planar 'coupled water pair' cluster in disordered solids: Theory of the ^{1}H NMR dipolar Hamiltonian 769
Pulse radiolysis
One-electron oxidation of toluidine blue. A pulse radiolysis study 147
Pyrazinamide dimer
Depolarizaion ratio of low-frequency hydrogen bond Raman bands for semicrystalline pyrazinamide 653

Quadrupole-splitting
Models of the cytochromes-b and related heme proteins 353

Raman/FT–IR spectroscopy
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713
Raman band profiles
Rotational relaxation times from Raman band profiles for benzonitrile in different solvents 669
Raman induced phase conjugation spectroscopy
Raman induced phase conjugation spectroscopy 565
Raman scattering
Raman scattering of ZnSe grown by molecular beam epitaxy 593
Raman scattering in narrow-gap semiconductors 607
Raman scattering in magnetic materials 629
Raman scattering experiments
Einstein-like phonons in InSe 601
Raman spectra
Raman spectroscopic study of the environment of tryptophan residues in bovine α-lactalbumin 693
Raman spectra of epoxy resins
Temperature and radiation effects on the Raman bands of epoxy resin 721
Reactivity in aqueous media
Newer manifestations of reactivity of coordinated peroxide at metal and non-metal centres 365

Reconstituted heme proteins
Reconstituted heme proteins: An investigation of the binding of inorganic and organic substrates to Mn(III) horseradish peroxidase 428
Reconstitution
Metal ion environment in reconstituted hemoglobins and myoglobins 337
Redox properties
Redox properties of copper(II) alicyclic α-amino acid complexes 458
Redox regulated isomerism
Ferroverdin: Cation variation and recognition of isomeric *tris* chelate geometries by iron oxidation states 195
Reflectance spectra
Diethylenetriamine *bis*(dithiocarbamato) derivatives of some first row transition metals 725
Reproportionation constant
Study of the effect of nature of ligand on reproportionation constants of ternary complexes 513
Resonance Raman scattering
Resonance Raman scattering in mercury telluride 643
Resonance Raman studies
Resonance Raman studies of metalloporphyrins 291
Reversible complexation of iron(III)
Reactions in micellar solutions. Kinetics and mechanism of reversible complexation of iron(III) with NCS^-, salicyclic acid, salicylatopentamine-cobalt(III) and oxalatopentammine cobalt(III) in aqueous micellar media 454
Reversible one-electron reduction
Redox properties of copper(II) alicyclic α-amino acid complexes 458
Rotational isomers
Conformations of α, β-unsaturated ketones: An IR spectroscopic study 45
Rotational relaxation times
Rotational relaxation times from Raman band profiles for benzonitrile in different solvents 669
Ru(III)-catalysed oxidation
Kinetics and mechanism of Ru(III)-catalysed oxidation of amino acids by N-chloro-N-sodiotoluene-*p*-sulphonamide in acid media 7
Ru^{III}(EDTA)/Ru^{V}=O(EDTA) couple
Thermodynamic fitness of an Ru^{III}(EDTA)/Ru^{V}=O(EDTA) couple in the oxygen atom transfer reactions 231
Ruthenium
Carbonyl complexes as homogeneous and supported catalysts 239
Chiral recognition through clays 203
Ruthenium(II) complex
Photosensitized energy transfer reactions of *tris*(4,4'-dialkyl-2,2'-bipyridine) ruthenium(II) complexes with substituted styrylpyridines 434
Sapphyrins
Texaphyrins and sapphyrins: Novel aromatic porphyrin-like macrocycles 418
Scalar displacements
Density of states of fractons on percolating networks 575
Schiff base complexes
Homogeneous catalysis of epoxidation of olefins by mono- and binuclear Schiff base complexes 247
Schiff base ligands
Binuclear dioxomolybdenum(VI) complexes containing bridging dioxime Schiff base ligands 443
Secondary alcohols
Oxidation of secondary alcohols by sodium N-bromobenzene-sulphonamide: A kinetic study 65
Semicarbazone and hydrazone
NMR and other physicochemical studies of uranium complexes with semicarbazone and hydrazone 438
Semiempirical model Hamiltonian
MNDO-EHP method for the calculation of vertical excitation energies 751
Sensitizer
Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions 329
Septadentate ligand
Dimanganese complexes of a septadentate ligand. Functional analogues of the manganese pseudo-catalase 424
Seven-coordinated antimony
Reactions of organoantimony(V) compounds with ONNO and SNNS donors 451
Silver–silver acetate electrode
Studies on silver–silver carboxylate indicator electrodes: Part 1 – The silver–silver acetate electrode 555
Single crystal EPR studies
Long range exchange interaction in (2,2'-bipyridine-3,3'-dicarboxylic acid)-dichlorocopper(II) monohydrate via lattice water: Single crystal EPR studies 437
Singlet molecular oxygen
Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions 329
Site-percolating networks
Superlocalization of fracton wavefunctions excited on percolating networks 581
Size effect
Raman scattering in magnetic materials 629
Slip distortion
Structure and bonding in metallocenes and oligomers 379

Solid state photoreaction
Laser Raman spectroscopic study of photoreaction dynamics in *p*-chloro cinnamic acid crystal 165
Solubilising agents
Laser Raman and infrared studies on hydrotropes and related materials 681
Solutions of nitrate ions
Photochemistry of aqueous and non-aqueous solutions of nitrate ion 435
Specific heat measurements
Nature of spin state transition in Fe(II) thiazoline complexes: Specific heat measurements 457
Spectrofluorimetric technique
Inter- and intramolecular electron transfer reactions of cobalt(III) complexes 433
Spectroscopy
Metal ion environment in reconstituted hemoglobins and myoglobins 337
Spin density
Charge, spin and theoretical densities in transition metal complexes 403
Spin-glass behaviour
Investigation of spin-glass behaviour in some mixed metal oxidic systems 453
Spin state transition
Nature of spin state transition in Fe(II) thiazoline complexes: Specific heat measurements 457
Split in the C=O bands
Conformations of α, β-unsaturated ketones: An IR spectroscopic study 45
Stability constants
Stability and structure of Cu(II) and Zn(II) ternary complexes with L-glutamic acid and some diaminocarboxylic acids 731
Standard free energy
Studies on the complexation behaviour of dehydroacetic acid-4-methyl-2-quinolylhydrazone with bivalent metal ions 497
Standard macroscopic formalism
Resonance Raman scattering in mercury telluride 643
Starch
Raman and infrared spectra of starch samples of sweet potato and cassava 705
Stimulated Brillouin scattering
Effect of doping on stimulated Brillouin scattering in semiconductors 585
Stopped-flow spectrophotometry
Kinetics of the interaction of *trans*-cyclohexane-1, 2-diamine-NNN′N′-tetraacetatomanganate(III) with thiourea and N-substituted derivatives. A stopped-flow spectrophotometric study 456
Stopped-flow technique
Kinetics and mechanism of metal ion catalysed aquation of some carboxylato(amine) cobalt(III) ions 455
Structural analogue of ferroquinone complex
Iron(II) complexes of *o*-functionalized *p*-naphthoquinones. 2. Crystal and molecular structure of *bis*(aquo) *bis*(lawsone) iron(II) and intermolecular magnetic exchange interactions in *bis*(aquo) *bis*(3-aminolawsone) iron(II) 446
Structural unpinning model
Physico-chemical investigation of fast ion conducting AgI-Ag_2SeO_4 glasses 541
Structure of hemin aggregates
Structure of hemin aggregates in solution 430
Substitute for the basic-H_2O_2 reagent
Newer manifestations of reactivity of coordinated peroxide at metal and non-metal centres 365
2-Substituted benzimidazole
Unusual shielding of *i*-propyl protons of 2-substituted benzimidazole in a mononuclear iridium(I) complex 439
Substituted styrylpyridines
Photosensitized energy transfer reactions of *tris*(4,4′-dialkyl-2,2′-bipyridine) ruthenium(II) complexes with substituted styrylpyridines 434
Substituted tetrathiofulvalene
Synthesis and characterisation of substituted-tetrathia-fulvalene π-donors: *bis*(butylenedithio) tetrathiafulvalece (BBDT-TTF) and *bis*(*o*-xylenedithio) tetrathiafulvalene (BXDT-TTF) 449
Substituted uracils
Vibrational Raman spectra of some substituted uracils 687
Sulphur-bridged complexes
Changing structural and chemical features of systems arsenic to bismuth with asymmetric sulphur ligands 441
Surface acidity
Surface acidity in promoted molybdena and tungsta hydrodesulphurisation catalysts 117
Sweet potato
Raman and infrared spectra of starch samples of sweet potato and cassava 705
Synthesis
Synthesis and biological activity of 4-(N-arylidene acetylhydrazido)-1,4-benzothiazin-2,3-diones, azetidinones and thiazolidinones 535
Synthesis of oxopolymetalates
Oxygen transfer from peroxometalates as a new route to the synthesis of uncommon and unknown oxopolymetalates: Synthesis and crystal and molecular structure of $(PPN)_2[W_6O_{19}]$ and $(PPN)_2{\cdot}[Mo_2O_7]$ 461

TO phonons
Raman scattering in narrow-gap semiconductors 607
Tellurium bridged complexes
Tellurium as a bridging ligand in cluster synthesis 395

Temperature and irradiation effects
Temperature and radiation effects on the Raman bands of epoxy resin 721
Temperature dependence
Photoconductive properties of zeaxanthin in a sandwich cell 73
Terminal sulphido group
The mechanism of action of xanthine oxidase 422
Ternary complexes
Study of the effect of nature of ligand on reproportionation constants of ternary complexes 513
Stability and structure of Cu(II) and Zn(II) ternary complexes with L-glutamic acid and some diaminocarboxylic acids 731
Tetrahedral distortion
Models for blue copper proteins – The influence of tetrahedral distortion on spectra and redox 432
Tetragonal unit lattice
Magnetic and spectral studies of transition metal complexes of salicylaldehyde-2-aminoacetophenone-2-thenoylhydrazone 503
Texaphyrins
Texaphyrins and sapphyrins: Novel aromatic porphyrin-like macrocycles 418
Theoretical density
Charge, spin and theoretical densities in transition metal complexes 403
Thermodynamic behaviour
Studies on silver–silver carboxylate indicator electrodes; Part 1 – The silver–silver acetate electrode 555
Thermodynamic fitness
Thermodynamic fitness of an Ru^{III} (EDTA)/Ru^{V}=O(EDTA) couple in the oxygen atom transfer reactions 231
Thermodynamic parameters of aggregates
Structure of hemin aggregates in solution 430
Thermodynamic stability constant
Studies on the complexation behaviour of dehydroacetic acid-4-methyl-2-quinolylhydrazone with bivalent metal ions 497
Thermogravimetric measurements
Binuclear dioxomolybdenum(VI) complexes containing bridging dioxime Schiff base ligands 443
Thiaporphyrins
Spectroscopic studies on monomers and dimers of thiaporphyrins 307
Thiazine dyes
One-electron oxidation of toluidine blue. A pulse radiolysis study 147
Thiazolidinones
Synthesis and biological activity of 4-(N-arylidene acetylhydrazido)-1,4-benzothiazin-2,3-diones, azetidinones and thiazolidinones 535
Thiocarbohydrazide
Kinetics of oxidation of S–N donor ligands by hydrogen peroxide 463
Thiosemicarbazide
Kinetics of oxidation of S–N donor ligands by hydrogen peroxide 463
Three-dimensional percolating networks
Density of states of fractons on percolating networks 575
Toluidine blue
One-electron oxidation of toluidine blue. A pulse radiolysis study 147
Transition metal complexes
Charge, spin and theoretical densities in transition metal complexes 403
Magnetic and spectral studies of transition metal complexes of salicylaldehyde-2-aminoacetophenone-2-thenoylhydrazone 503
Transition metal hexacarbonyls
Electron energy loss spectroscopic study of $Cr(CO)_6$, $Mo(CO)_6$ and $W(CO)_6$ in the vapour phase 1
Transition state geometry
Some fundamental issues in octahedral substitutions 459
Transverse frustrated spin behaviour
Investigation of spin-glass behaviour in some mixed metal oxidic systems 453
Traumatology
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713
Trinucleation
Ferroverdin: Cation variation and recognition of isomeric *tris* chelate geometries by iron oxidation states 195
Tripledecker, tetradecker, pentadecker sandwich compounds
Structure and bonding in metallocenes and oligomers 379
Trivalent borane
Isolobal analogy between trivalent boron and divalent silicon 107
Tuberculosis
Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology 713
Tungsta
Surface acidity in promoted molybdena and tungsta hydrodesulphurisation catalysts 117
Two-photon absorption
Some new aspects of lanthanide optical spectroscopy: Circular dichroism and two-photon absorption 255
Type II sites
Model compounds for the type III site and the combined type II and type III sites in multicopper oxidases 209

Type III sites
Model compounds for the type III site and the combined type II and type III sites in multicopper oxidases 209

Ulam subgraph
Study of trends in charge-transfer absorption maxima of some π-type molecular complexes using graph-theoretical techniques 759
Ultrafine particles
Chemical processing of electronic ceramics with ultrafine particles 452
Undirected graph
Topological solution of algebraic eigenvalue problem 51
Unidentate ligand complexes
Preparation and spectral studies of di-*i*-propyltin dichloride and its adducts with some N-donors 440
Unusual shielding of protons
Unusual shielding of *i*-propyl protons of 2-substituted benzimidazole in a mononuclear iridium(I) complex 439
Uranium and lanthanide complexes
Chiroptical studies on coordination compounds of aldimine derivatives of amino acids 436
Uranium complexes with Schiff bases
NMR and other physicochemical studies of uranium complexes with semicarbazone and hydrazone 438
α, β-Unsaturated ketones
Conformations of α, β-unsaturated ketones: An IR spectroscopic study 45

Vertical transition energy
MNDO-EHP method for the calculation of vertical excitation energies 751
Vibrational bands
Rotational relaxation times from Raman band profiles for benzonitrile in different solvents 669
Vibrational Raman spectra
Vibrational Raman spectra of some substituted uracils 687
Vibrational spectra
Vibrational spectra of 1,6-dichlorohexane, *n*-chloro-, 2-chloro and 3-chlorohexanes 661
Raman and infrared spectra of starch samples of sweet potato and cassava 705
Voltammetry
Electroanalytical study of the anodic wave of 5-nitroorotic acid 25

Weak exchange interaction
Spectral and magnetic investigations on some binuclear oxovanadium compounds 99
Weissenberg technique
Crystal and molecular structure of 3-benzoylpropionic acid 39

X-ray structure
Structure–function relationship in some macrocyclic dicopper complexes 269
Xanthine oxides
The mechanism of action of xanthine oxidase 422

Zeaxanthin
Photoconductive properties of zeaxanthin in a sandwich cell 73
ZnSe thin films on GaAs
Raman scattering of ZnSe grown by molecular beam epitaxy 593
